

I am writing regarding the possible replacement of K-LOVE (heard via FM translator in my area at 106.7) by a LPFM. There is no broadcast comparable to K-LOVE in my area; other Christian radio stations carry a format containing substantially more talk programming. K-LOVE is a valuable community resource, providing an alternative music listening opportunity that would be hugely missed were it removed. It provides regional information, as well as national news coverage and updates on Christian related topics that cannot be heard on other stations. Primarily, it provides a wonderful broad base of contemporary Christian music options. Please do NOT replace FM translator K-LOVE with a Low Power FM station. Thank you!
